

// arkintel · the sovereign office company

A secure office suite for your organisation, set up your way.

Start with **ArkOffice**, our AI-native office suite: chat, mail, docs, drive, sheets, slides and more, with AI built into every app. We set it up as your own: your own custom domain, your branding, on your systems (even fully offline) or our European cloud. Then we connect your data sources and build any custom apps you need. Data stays in the EU, under European law, never trained on.

Your domain & branding · Self-hosted or air-gapped · Encrypted, under EU law

01 · arkoffice suite

Try ArkOffice

Start with the live AI-native suite, free in your browser today.

02 · made yours

Set it up your way

Your domain, branding and infrastructure, EU cloud to air-gapped.

03 · set up & extended

Customise & extend

We connect your data and build the custom apps you need.

// clients we've built with

01 — ARKOFFICE SUITE

Start with ArkOffice. A real suite, live today.

Nine apps that work just like the tools your team already uses, built on a European open-source office engine, with AI woven into every one of them. It is live and in production now, and free to try in your browser before a single call.

Chat

Ask anything in plain language, with live web search.

switch models mid-thread

Docs

A full word processor with AI to draft, rewrite and summarise.

word · .docx

Sheets

Formulas, charts and pivots; AI builds formulas and cleans data.

excel · .xlsx

Slides

Decks with the layouts you know; AI drafts and restyles slides.

powerpoint · .pptx

PDF Editor

Annotate, fill, merge and sign; AI summarises and extracts data.

edit · sign · .pdf

Drive

Every file, versioned and searchable; the context AI works from.

opens .docx .xlsx .pptx

Email

Familiar inbox with AI triage and drafting, never scanned for ads.

syncs google · microsoft

Calendar

Day, week and month views with AI scheduling and meeting prep.

syncs google · microsoft

Transcription

Speaker-labelled transcripts and the minutes your team reads.

on-prem · pii redaction

// Every answer, your choice of model: Claude · ChatGPT · Gemini · Mistral · or fully private European models. Nothing is ever used to train.

• Live and in production today

• Free to try, no sales call needed

• Familiar apps, AI built into each one

02 — SET IT UP YOUR WAY

The same product, sealed inside your walls.

We set up that exact product as your own, under your domain, branding and visual style, wherever your constraints require it. Your data stays in the EU or inside your walls, by design.

// our european cloud

Fully managed, EU-hosted

Managed on EU-owned infrastructure. The fastest way to roll out across your organisation.

// your private cloud

Inside your own VPC

Set up in the cloud you already use. Your network, your keys, your perimeter.

// your own hardware

On servers you control

The whole suite on-premises with open-weight models. Nothing leaves the building.

// fully air-gapped

No internet path at all

For the environments that demand it. Same product, same updates, your terms.

**Your data stays in the EU**

EU-resident infrastructure under European jurisdiction. Self-hosted, nothing leaves your hardware.

**No US CLOUD Act exposure**

A European company under European law. Your data is outside the reach of US legal demands.

GDPR

EU AI Act

NIS2

DORA

// every setup ships mapped to your frameworks, with the DPIA, SBOM, audit-log spec and a documented exit plan

100%

// european jurisdiction, either way

0 bytes

// leave your perimeter, self-hosted

Live today

// in production with the dutch public sector

03 — CUSTOMISE & EXTEND

Where the suite stops, we keep building.

We wire in your own data sources, SSO and the systems you already run. Then, where the suite stops, we design and build new apps, modules and integrations from scratch, all shipped under your brand by one small senior team.

- Connect your sources, SSO & systems

- New apps & modules built from scratch

- Custom integrations, under your brand

// the guarantees, every step of the way

- ✓ Your data in the EU, always
- ✓ RBAC, admin console & full audit logs
- ✓ Continuous updates, zero downtime
- ✓ SSO, SAML & SCIM into your IdP
- ✓ Triple-redundant, with offsite EU backups
- ✓ Migration, support & a documented exit plan

Try ArkOffice free, or book a custom setup.

Open ArkOffice in your browser today, no card and no sales call. When you're ready to make it your own, tell us your industry, your data and your regulator, and we send back a setup plan, the DPIA and the compliance pack.
